

How to Suggest Enhancements for future versions of PowerSDR

How to Suggest Enhancements for future versions of PowerSDR

Content provided by: FlexRadio Systems Engineering

PowerSDR is continuously being refined and updated. New features and enhancements to the current program come from many different sources. Most of these changes come from Flexers themselves. There is a specific place for Flexers to enter their enhancement requests; the Enhancement Tracker. The Enhancement Tracker allows Flexers to submit an enhancement directly to the PowerSDR development team. It also contains a "blog" feature where other Flexers can comment on the enhancement so that a wide range of views can be expressed. Periodically, a "poll" will be devised to allow Flexers to rate the enhancements in terms of importance. The ones that get the highest ratings, will be the first ones considered for inclusion into PowerSDR.

Sending Enhancement requests to the Reflector will only result in your enhancement request not getting into the Enhancement Tracker, therefore it will not get consideration or placed into the process for evaluation.

When submitting an enhancement, please include the following if applicable:

- A clear description of what the enhancement should accomplish
- What is the benefit of the enhancement
- Exactly how it would work
- If it is a UI (user interface) enhancement, where in the program should it go.

In order to add an enhancement request you need to be logged on to the FlexRadio Systems Support site.

Enter into the Support Site (<http://support.flex-radio.com/Home.aspx>) and click on **Login** at the top right hand side of the page. Alternately you can access it directly from this URL (<http://support.flex-radio.com/login.aspx>).

If you do not have a logon ID then click the **New Registration** button. Enter the required data and click on the Submit button. If you have signed up for the Reflector, you need to un-check the box that says sign me up for the Reflector.

Use the link below to enter the Flex-Radio Enhancement Tracker
